The New Ways of Working

What do workspaces need today?

How are the demands and needs of people change in our time?

Adapt to Work in Shared Spaces

The new forms of work; hybrid and remote models are causing lower office occupancy, increasing demand for shared office spaces, especially in smaller areas.

The Age of Meetings

Recent data shows that 83.13% of employees dedicate up to one-third of their work week to meetings. Of which; 41.8% spend 30 minutes to an hour in meetings on average, while 22.5% have meetings lasting up to two hours. This intense schedule creates a need for well-conditioned, multiple meeting spaces within offices.

Need for Privacy

Exposure to noise pollution causes stress-related cardiovascular disorders. In shared offices, the need for quick escape, privacy, and concentration zones with small footprints is of great importance.

Adaptation to Working in Shared Spaces

New working models, such as hybrid and remote work, are reducing office occupancy rates, which in turn is increasing the demand for shared office spaces, particularly in smaller areas.

Acoustic

Reduced Noise, Improved Concentration

Being exposed to sound pollution causes stress related cardiovascular disorders. A quick escape from noise, Calma creates the perfect spot with **Class A Soundproofing, certified by ISO 23351-1.**

The perfect voice clarity is developed with the engineered acoustic layering of Calma; reaching **0,30 sec of reverberation time.** Constantly tested and re-developed within the in-house **Acoustic Lab**; materials used to create Calma sets the new standards in the industry. Unlike others; Calma ensures a balanced blockage of **both low and high-frequency sounds.**

ISO
23351-1

We Care About the Air You Breathe

Calma acoustic pods are crafted entirely from **VOC free materials (organic or inorganic compounds)**, ensuring that your health is never compromised. There are no Xylenes, formaldehyde, acetone, chloroform, benzene or toluene in VOC-free air of Calma, providing **long hours of fresh air**.

Engineered to maintain constant fresh air circulation, Calma ensures CO2 levels **below 1000 ppm** and an air exchange rate **up to 106 times per hour**. As the perfect proportion for a regular meeting room, the constant fresh air creates an approximately 17 times better air circulation. The **double redundancy** ventilation system is also adjustable from the touch screen controls and **air flow direction is reversable** from the vents at the top to the bottom, or vice-versa.

Reducing Stress is More Important Than Ever

Have you been experiencing visual strain lately? Long hours of exposure to light can cause **chronic headaches** and distractions.

Calma uses the closest possible light temperature and brightness to **daylight (2700K)**. Daylight-mimicking amplifies the pod's affects on your well-being; aligning closer with **circadian rhythms** and preferences.

Engineered and carefully calculated lighting distribution ensures that everyone in the meeting has **enough light to work** and look their best during long hours of meetings or focus group work.

Nurus Links

Create the Perfect Workspace Conditions

Stay seamlessly connected with Calma's thoughtful design, featuring convenient **Nurus Links with multi-national sockets**, USB ports, and HDMI connections within the cabin. Always ready to provide secure and stable connection at all times with Nurus Links and Media Wall makes sure you look your best at all times.

Providing one of the best video conference performances, **Calma For U's Media Wall integration** is engineered for creating the optimal workspace and digital communication experience.

Space is an Organic Environment

Calma pods up to XLarge has **castors to help easily relocate**. Built upon its floor plate like legos, the modular components of Calma is easily assembled and installed.

All finishes and materials of Calma pods are selected in **neutral shades** for blending in perfectly with its environment. Supporting any sudden changes you might need for your office layouts. Safety is always a paramount with **seismic foot plates**, providing stability and security in the rare event of earthquakes.

Sustainability

We Know Our Impact

Calma pods are made with 100% solar energy
and our unwavering dedication to sustainability.

“Calma exemplifies commitment to environmental sustainability through its efficient, innovative manufacturing processes and use of eco-friendly materials. Manufactured within a 95% vertically integrated facility, the circular production system minimizes Scope 3 Carbon emissions.”

Calma pods are crafted using a zero-waste, HDF powder coating process, which eliminates any VOC (organic and inorganic) emissions and results in a fine-grained, antibacterial surface that is easy to clean and maintain. This process also uses lower heat (130-140°C) for curing a thermoset, durable surface, reducing energy consumption compared to traditional methods. The product's structure incorporates responsibly sourced materials, including FSC MIX certified,

CARB2, and NAF wood, and 50% recycled PET felt. Calma holds multiple certifications, including Indoor Air Quality Gold, supported using Basotect G+ layers instead of conventional stone-wool insulations, enhancing both acoustic performance and environmental sustainability. Additionally, Calma's packaging is made from 100% recyclable materials, further minimizing its environmental impact.

By integrating sustainable manufacturing techniques, renewable energy sources, and recyclable components, Calma For U sets a new standard for sustainable workplace solutions. It not only meets but exceeds current environmental standards, making it an excellent choice for organizations committed to sustainability.

Tedarik Zinciri

We Are The Supply Chain

Calma pods are crafted within Nurus' extensive **45,000 sqm** manufacturing facilities, with **95% vertical integration** and a **century of expertise**. Every step of production is meticulously tracked, ensuring reliability and resilience against external influences. This fully in-house, circular system not only guarantees **superior product quality** but also significantly reduces Scope 3 Carbon Footprint, setting a new standard in the industry.

With our **Head Quarters in Ankara and warehouses in Germany and North America**, Calma products are delivered punctually through our extensive distribution network, ensuring safe and timely delivery every time.

Sustainability

Good Products Choose Their Own Material

Calma is layered with Basotect G+ for superior soundproofing and Indoor Air Quality. Coated with industry leading HDF Powder Coating technology; Calma ensures a **durable, healthy and sustainable** use; preserving **Zero VOC** air quality.

Basotect G+

Calma incorporates Basotect, a sustainable material renowned for its eco-friendly properties and exceptional sound absorption capabilities. Basotect enhances the acoustic performance of Calma pods while minimizing environmental impact, aligning with Calma's commitment to sustainability and innovation.

HDF Powder Coating

Using HDF powder coating, Calma enhances durability and moisture resistance while providing a smooth finish. This process emits zero VOCs, ensuring better indoor air quality and environmental responsibility.
